

PROTOTYPE

Decidos

Accessible, usable and secure online voting in low-stakes elections using identity wallets

Floris Jansen, Hanna Schraffenberger, Bart Jacobs
Radboud University - floris.m.jansen@ru.nl

BACKGROUND

- No election platform integrating literature on usability and accessibility
- Complex and insecure eligibility proving and vote verification in existing platforms
- Identity wallets will become used more widespread thanks to eIDAS2.0

Secure and flexible proof of eligibility

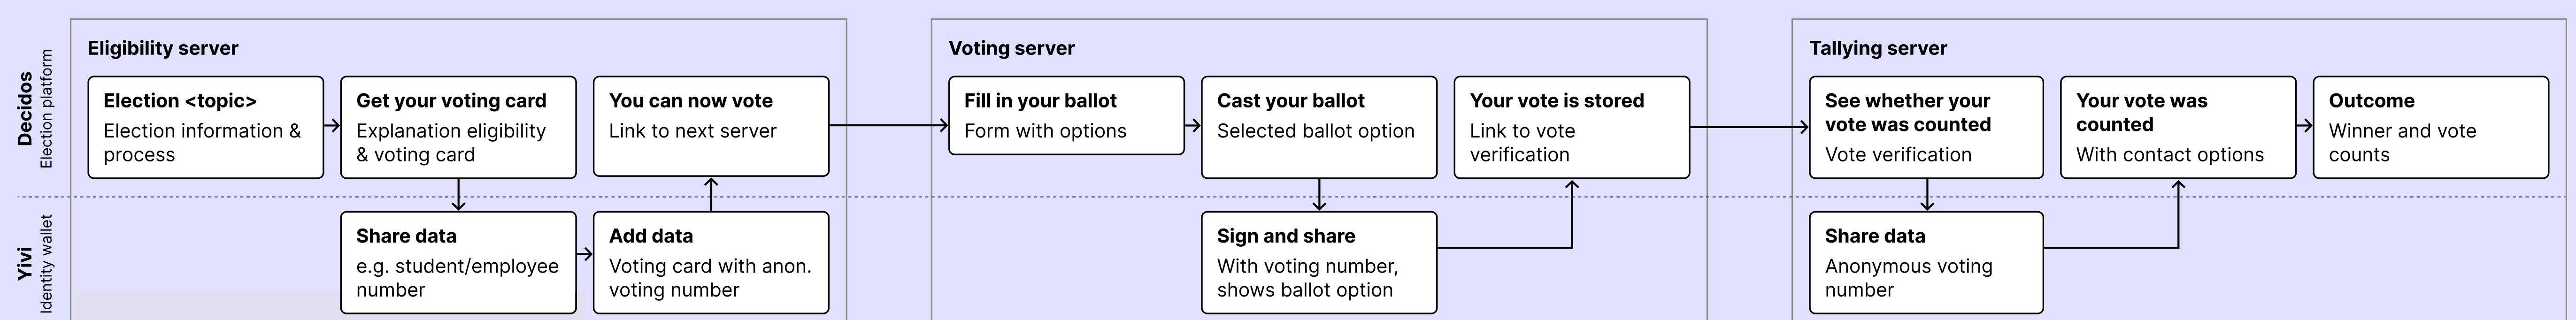

Proof with identity wallet, without voter registration or insecure mail distribution

Trusted anonymous votes

Anonymous voting card proves eligibility on a separate server, so no link with personal data

Accessible vote verification

No manual string comparison, anonymous voting card used to check if vote was counted

E-VOTE USABILITY

In order to show that you are eligible to vote in this municipal election, you need to provide proof of your residency in the municipality of Nijmegen using your EUDI wallet application.

Easy instructions

Plain language in short texts with large type.

Changing your vote

If you want to change your vote, go to the ballot and recast your vote. This will

Re-cast option

To prevent coercion, voters can overwrite their previous vote

Non-steering ballot

No images or colours for the ballot options, randomly ordered

The screenshot shows the Decidos mobile app interface. At the top, it says "Decidos Election CHI2027 location". Below that, it indicates "Step 2 of 4". The main heading is "Fill in your ballot". The question is "Where should CHI2027 be hosted?". There are four radio button options: "Barcelona, again!", "Mordor, Middle Earth", "Antarctica", and "None of the above (empty ballot)". A blue button at the bottom says "Continue to casting vote". At the very bottom, there is a link: "Wissel naar het Nederlands".

VOTE VERIFICATION

Easy vote verification

Anonymous vote number disclosed by identity wallet, no manual comparing of strings

If you have any concerns about the result, please contact the election organiser:

- Call +31 20 1234567
- Or send an email to

Clear follow-ups

Contact options and instructions shown for problems with votes

Thanks for voting in this election!

See whether your vote was saved

Stimulating verification

Announced before voting, available right after casting vote, and natural part of flow

ACCESSIBILITY

Responsive

To the screen size, colour (dark or high contrast mode) and reduced motion preferences

Semantic HTML

For compatibility with assistive technologies such as screen readers or keyboard-only use

Colour contrast

Conforms to WCAG AAA with 7:1 contrast ratio for small text and 4.5:1 for larger and bold text

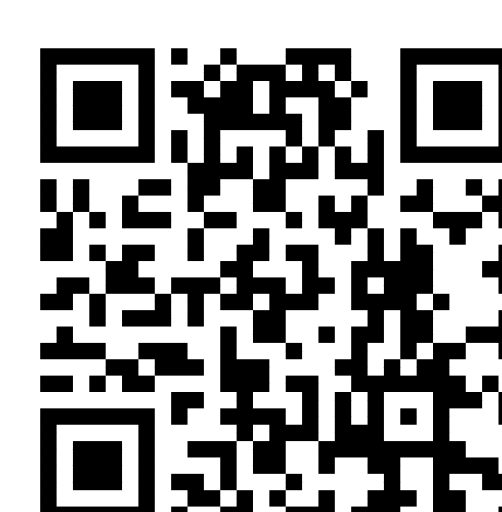

OPEN QUESTIONS

How does the use of identity wallets impact voting experience?

Do users understand the role of identity wallets?

Should we show the split sever design and if so, how?
